Why Secomea X Advantech

- One-stop solution providing IPC's with remote access
- Flexible solution: Every application requires a specific solution, in terms of form factor, performance and I/Os
- Best in class partnership
- No need for additional components or integration
- Simple and reliable solution

To get started – contact your local Advantech supplier

Remote access features:

- Configuration and maintenance via web browser, accessible locally on the device where SM-E is installed or remotely.
- Any network device can be easily accessed from a Windows PC for programming and diagnostics using common PLC or HMI software tools
- Any network device can be accessed from Tablets and Smartphones for accessing Web interfaces, Remote Desktop (RDP/VNC) or Remote HMI apps
- Drag-and-drop role-based management. Define fine-grained access down to a single IP address, USB, Serial device, or even port on a PLC or HMI
- Security certified ref. IEC 62443 / NIST / BSI
- All events, such as user access and configuration changes, are automatically logged on the GateManager server Audit log of all events (user access, config changes etc.)
- Integrated alarm feature (Automatic send to SMS or Email)
- Full API Available for the SiteManager Embedded
- From a Log server: Permanent connections for push or pull collection of data – Either to the device itself or devices on the same network.
